Profile

Hi:) I was trained as a Quantum/HPC researcher specialized with 256-node Perlmutter simulations and IBM/IonQ QPUs; developed arithmetic quantum algorithms bridging classical-quantum data transport, AI, and NP-hard optimization; strengths: experimental/math rigor, coding, data analysis, communication, cross-disciplinary collaboration; collaborators/mentors: Jan Balewski (Berkeley), Alex Khan (MD, DC), Ziwen Pan (TX, AZ).
Keywords for my research: quantum information (encoding), computing (QAOA), error correction (CSS), cryptography (communication upper bound).

Education

Texas Tech University, PhD, High Performance Computing Center Fellow	July 2026 (expected)
Newcastle University, MSc, Advanced Computer Science, Merit	Aug 2023
University of Tennessee, Chengdu University of Information Technology, BE, Distinguished Graduate	Jul 2021

Peer-reviewed Publications

- Ziqing Guo, Ziwen Pan. (2026). Quantum Polynomial Root Finding and Entanglement-enhanced Spatial Encoding for High-dimensional Data Processing (APS March Meeting). Submitted.
- Ziqing Guo, Jan Balewski, Wenshuo Hu, Alex Khan, Ziwen Pan. (2025). Quantum Approximate Walk Algorithm (Nature npj quantum information, APS March Meeting). Submitted.
- Ziqing Guo, Jan Balewski, Ziwen Pan. (2025). ShardQ: Circuit Cutting and 3D Tensor Recomposition for Quantum Simulation on Superconducting Qubits. Submitted to the International Symposium on Computer Architecture (ISCA). Submitted.
- Ziqing Guo, Jan Balewski, Ziwen Pan. (2025). Vectorized similarity attention with learnable encoding for quantum transformer. Accepted to the Association for the advancement of Artificial Intelligence quantum symposium (AAAI). Oral presentation.
- Ziqing Guo, Alex Khan, Victor S. Sheng, Shabnam Jabeen, Ziwen Pan. (2025). Quantum parallel information exchange (QPIE) hybrid network with transfer learning. In IOP Quantum Science and Technology. HTML
- Ziqing Guo, Steven Rayan, Wenshuo Hu, Ziwen Pan. (2025). [QAOA paper] Direct entanglement ansatz learning (DEAL) with ZNE on error-prone superconducting qubits. Accepted in IEEE International Conference on Quantum Computing and Engineering (QCE) Public Talk. PDF Oral presentation.
- Ziqing Guo, Jan Balewski, Ziwen Pan. (2025). Q-GEAR: Improving quantum simulation framework. In 54th International Conference on Parallel Processing (ICPP). Oral presentation. Accepted. Best Poster Award PDF

Employment Experience

Research Affiliate Intern, Lawrence Berkeley National Lab, NERSC	Jun 2024 – Present
Research Fellow, Texas Tech University	Sep 2023 – Present
Research Assistant, Newcastle University	Jun 2022 – Jun 2023
Cloud Engineering Intern, CISCO	Dec 2021 – Jun 2022

Grant & Awards

- | | |
|---|----------|
| • AAAI Quantum Symposia Travel Grant \$850 | Nov 2025 |
| • Texas Quantum Summit Travel Grant \$1k | Oct 2025 |
| • ICPP Travel Grant \$1k | Sep 2025 |
| • QCE Whiteacre College of Engineering Research Grant \$750 | Sep 2025 |

• IonQ Research Grant , \$350k	Jul 2025
• IBM LBNL QCAN Award , Contract, NERSC, DoE(No. DE-AC02-05CH11231)	Mar 2025
• GenQ Quantum Hackathon , \$2.5k, Cat Qubit, First Prize	Oct 2024
• Qiskit Quantum Summer School / Quantum Challenge , Full Achievement	Jun 2024
• AWS Braket Quantum Application Development , Certificate	Mar 2024
• AWS Braket Research Grant , \$2k, SV1, TN1	Feb 2024
• Pennylane Open Hackathon QHack / Code Camp , Top Completionist	Jan 2024

Invited Talks

Special topic on Q-Gear generalization NVIDIA, 2025
 International Conference on Parallel Processing, Quantum Computing, Sep 2025
 International Conference on Quantum Computing, QAI, Aug 2025
 Monterey Data Conference, Aug 2025
 IBM Quantum / AI, TTU, Apr 2025
 Improving quantum computation model, WCOE, Apr 2025
 HackTX, University of Austin, Jan 2025 (Mentor)
 Wave Technology, City of Calgary, Nov 2024
 Platform Calgary, University of Saskatchewan, QAI Venture, Oct 2024
 Berkeley National Lab, National Energy Research Computing, Quantum Group, Jul 2024
 QuEra - NERSC quantum group neutral atom pattern formulation, Jun 2024
 NVIDIA CUDA Quantum, QCAN, Jun 2024

Professional Services

npj Quantum Information
 IOP Quantum Science and Technology
 IEEE International Conference on Quantum Computing and Engineering
 IEEE Transaction on Quantum Engineering
 ACM Proceedings of the International Conference on Parallel Processing
 Quantum and Beyond NEWSLETTER
 Nature Machine Intelligence
 ACM Transactions on Quantum Computing
 Advanced Quantum Technology
 Wolfram Research Student Ambassador
 IEEE, ACM, APS member

Projects

- Improve quantum circuit simulation tool** github.com/gzquse/Q-Gear
- Support SLURM submission; PODMAN container; CUDA-kernel acceleration; PennyLane; image encoding.
- Direct entanglement ansatz learning for quadratic unconstraint binary optimization (QUBO)** github.com/gzquse/QUBO
- Distributed learning; efficient ansatz encoding; multiple QUBO problem solvers.

Skills

Quantum (Proficiency): QISKIT (Heron-3 type superconducting), **CUDA-Q** (cuTensorNet, cuStatevector, NVIDIA-GPU), **IONQ** (Trapped Ion Aria-2, Forte), **PENNYLANE** (software stack), **AMAZON BRAKET** (QaaS), **QCI-DIRAC3** (Photonic QPU), **FIRE OPAL (Q-CTRL)**, **TENSORCIRCUIT** (Tencent), **CIRQ** (Azure, Microsoft)

Engineering: Python, Mathematica, Fortran, CUDA/MPI, Bash, Julia, Matlab, Cray HPC, Slurm, Container, DevOps, Scrapy/Data Mining

Interests: Guitar fingerpicker, Table tennis (competitive, shakehand grip), Calisthenics, Rollerblading, Culinary enthusiast

Languages: English (proficient), Mandarin (native), Japanese (Elementary)
